Art Unit: 1755

Claims 1-62 are generic to the following disclosed patentably distinct species: compositions and methods of preparing said compositions comprising microcrystalline cellulose and 21-99% of an agent selected from the group comprising silicon dioxide, aluminum silicate, magnesium aluminum silicate, precipitated amorphous silica, titanium dioxide, aluminum oxide, zirconium oxide, calcium phosphate, polyvinyl pyrrolidone, carbon black, calcium sulfate, barium sulfate, calcium carbonate, sodium lauryl sulfate, corn starch, sodium starch glycolate, hydroxylated starch, hydroxy ethylated starch, potato starch, guar gum, acacia gum, glucosamine, chitin, chitosan, microcrystalline chitosan, polydextrose, gelatin, polylysine, polyalanine, polyacrylate, polyacetate, polypropionates, polybutyrates, polyalkane, polyalkenes, polyalkynes, phenolic resins, terpene resins, squalene resins, polyvinyl pyrrolidone/polyvinyl acetate copolymer, polysorbate and sodium lauryl sulfate. The species are independent or distinct because they differ in classification, observed use and chemical composition. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species recited may be found in the instant claims and paragraphs 69-71 of the instant specification. Applicant is required to elect a single compound (or narrow class of compounds as set forth above) or single combination of compounds for purposes of

Art Unit: 1755

examination. For example, a proper election would be the compositions and methods of preparing them comprising microcrystalline cellulose and 21-99% of an agent comprising precipitated amorphous silica and carbon black. Applicant is reminded to ensure proper antecedent basis for the species elected is present in the specification. For example, the materials recited in claim 8 are described in paragraph [0069] of the specification as in addition to the agents recited in instant claim 1. Upon election the scope of consideration will be expanded to be commensurate with that required for the elected species.

Restriction between the claims to a composition and the method claims is not required at this time.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1755

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
